- 12- Swisslog and Ubuntu 20.04 LTS.....10

1-Set architecture wine

In terminal as root: `sudo dpkg --add-architecture i386`

```
josef : bash — Konsole
Soubor  Úpravy  Pohled  Záložky  Nastavení  nápověda
josef@dtm:~$ sudo dpkg --add-architecture i386
[sudo] heslo pro josef:
josef@dtm:~$
```

2-Installation Wine and details is [HERE](#)

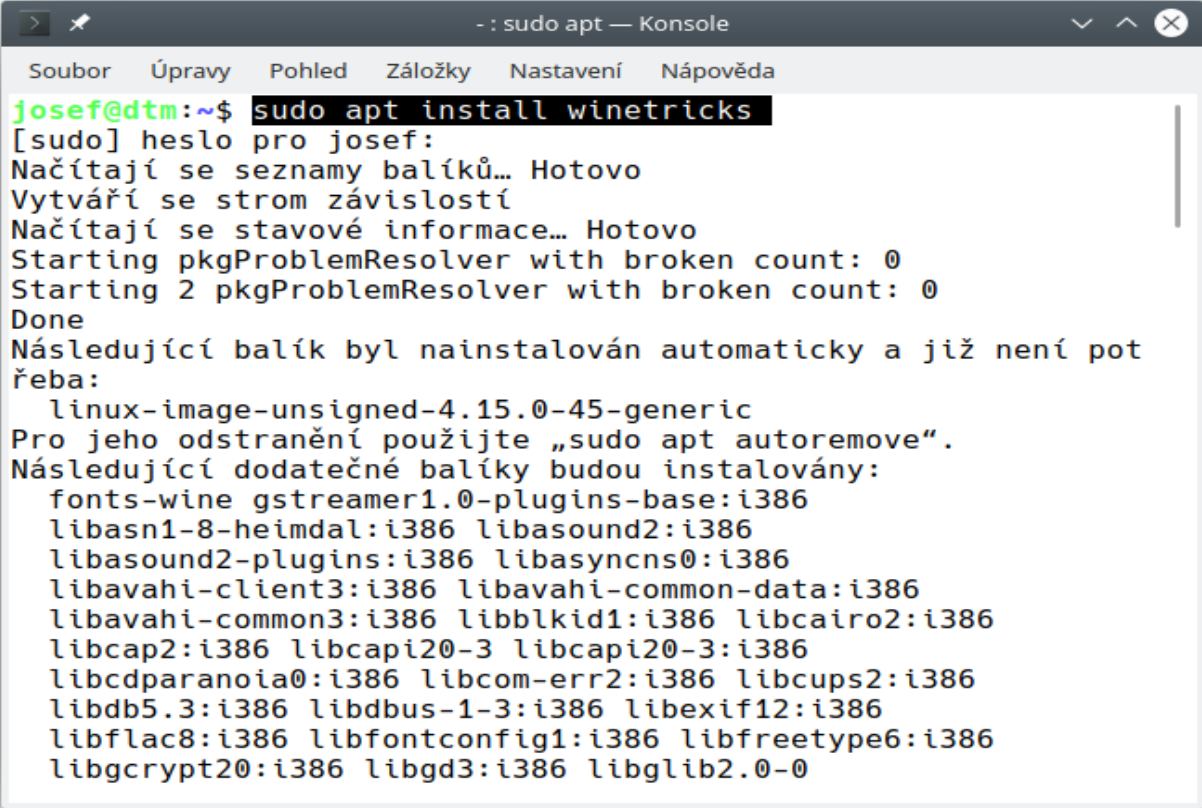

- In terminal as root: `sudo apt install wine-stable`
- In terminal as user: `wget -nc https://dl.winehq.org/wine-builds/winehq.key`
- In terminal as root: `sudo apt-key add winehq.key`
- In terminal as root: `sudo add-apt-repository 'deb https://dl.winehq.org/wine-builds/ubuntu/ focal main'`
- In terminal as root: `sudo apt-get update`
- In terminal as root stable branch v5.0.3: `sudo apt install --install-recommends winehq-stable`
or terminal as Development branch 6.0: `sudo apt install --install-recommends winehq-devel`

```
- : sudo apt — Konsole
Soubor  Úpravy  Pohled  Záložky  Nastavení  nápověda
josef@dtm:~$ sudo apt install --install-recommends winehq-devel
[sudo] heslo pro josef:
Načítají se seznamy balíčků... Hotovo
Vytváří se strom závislostí
Načítají se stavové informace... Hotovo
Starting pkgProblemResolver with broken count: 0
Starting 2 pkgProblemResolver with broken count: 0
Done
Následující balík byl nainstalován automaticky a již není potřeba:
  fuseiso
Pro jeho odstranění použijte „sudo apt autoremove“.
Následující dodatečné balíky budou instalovány:
  wine-devel wine-devel-amd64 wine-devel-i386:i386
Následující NOVE balíky budou nainstalovány:
  wine-devel wine-devel-amd64 wine-devel-i386:i386 winehq-devel
0 aktualizováno, 4 nově instalováno, 0 k odstranění a 0 neaktualizováno.
Nutno stáhnout 159 MB archivů.
Po této operaci bude na disku použito dalších 1 093 MB.
Chcete pokračovat? [Y/n]
```

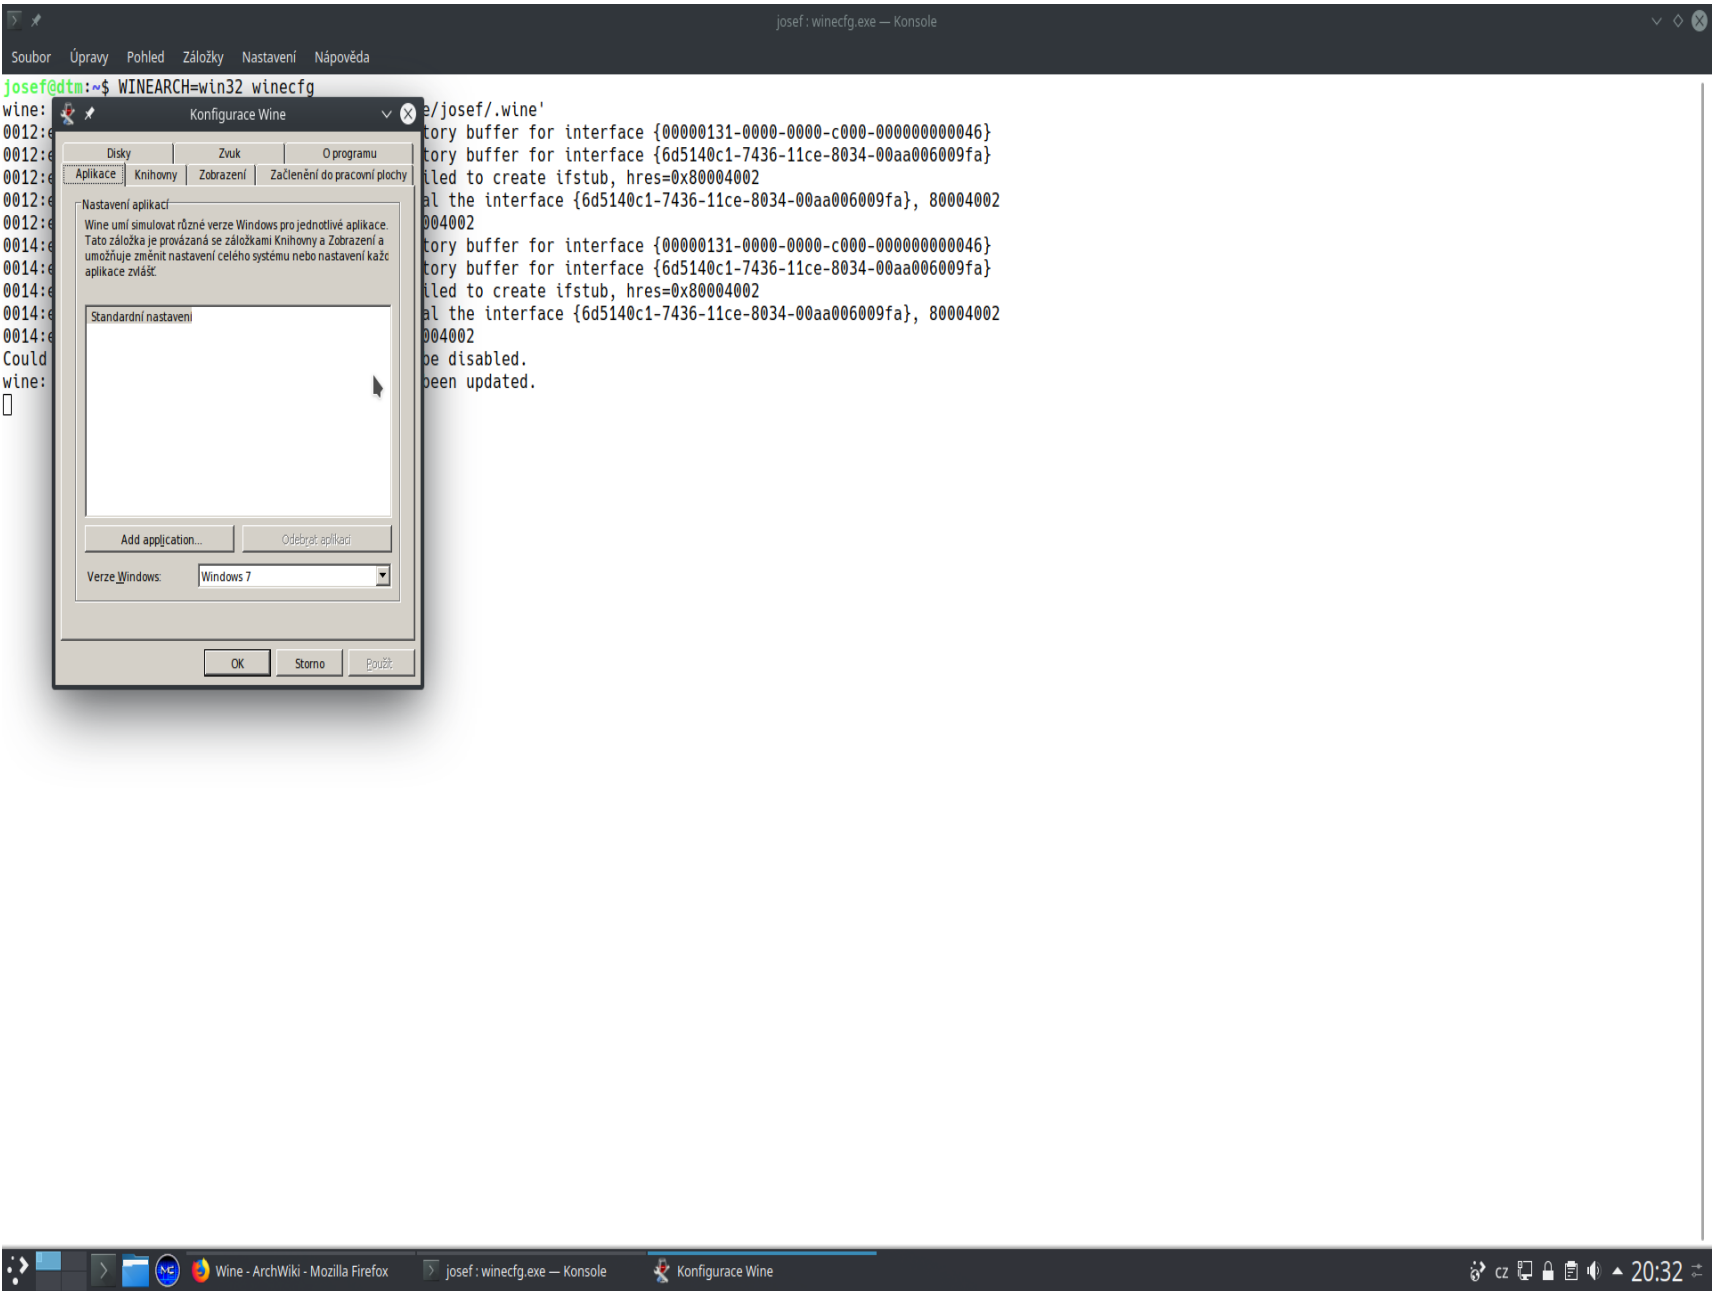

3-Installation winetricks as root

Terminal as root: `sudo apt install winetricks`

4-Create Win32 prefix as user

Terminal create Win32 prefix as user: WINEARCH=win32 winecfg

5-Installation mdac28 as user

Terminal as user: **winetricks mdac28**

It must be installed correctly otherwise Swisslog won't start and display initialization error

```

Swisslog for Windows Setup
Welcome
Welcome to the installer for Swisslog for Windows 5.101.

Welcome

If you have any other programs running, please click Cancel, close the
programs, and run this setup again. Otherwise, click Next to continue.

IMPORTANT: It's highly advisable to disable temporarily any antivirus software
before installing Swisslog. Also add an exception to Swisslog in your antivirus
and firewall after installation. Some of them tend to block/slow down normal
functioning of Swisslog.

< Back  Next >  Cancel
```

8-First start Swisslog as user

First start from terminal:

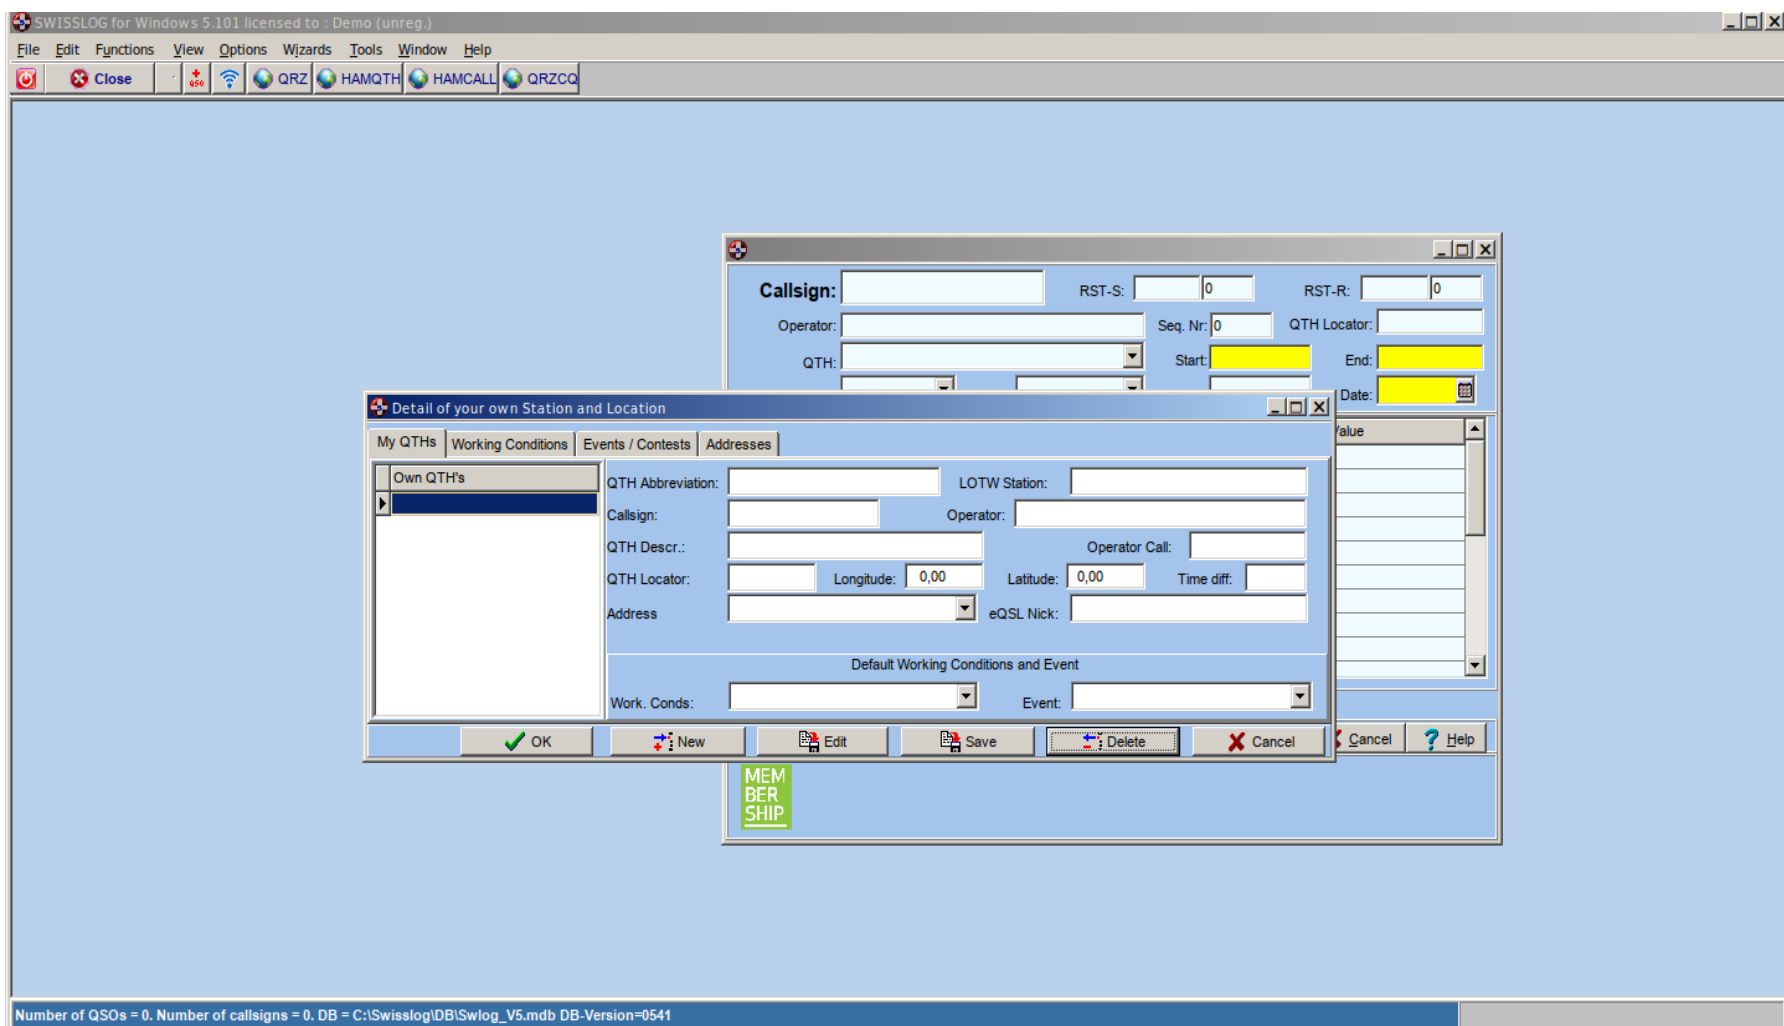

wine "/ home/josef/.wine/drive_c/Swisslog/SwissIV5.exe"

```

josef : SwissLV5.exe — Konsole
Soubor  Úpravy  Pohled  Záložky  Nastavení  Nápověda
josef@dtm:~$ wine "/home/josef/.wine/drive_c/Swisslog/SwissLV5.exe"
0009:err:winediag:SECUR32_initNTLMSP ntlm_auth was not found or is out
dated. Make sure that ntlm_auth >= 3.0.25 is in your path. Usually,
you can find it in the winbind package of your distribution.

█

```

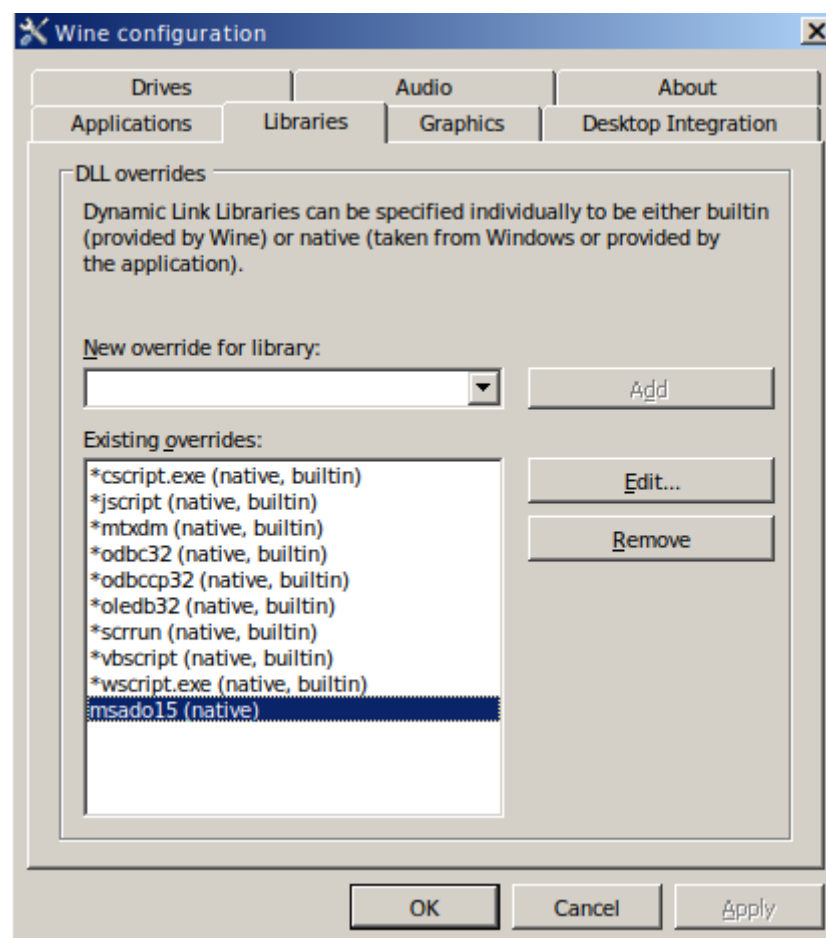

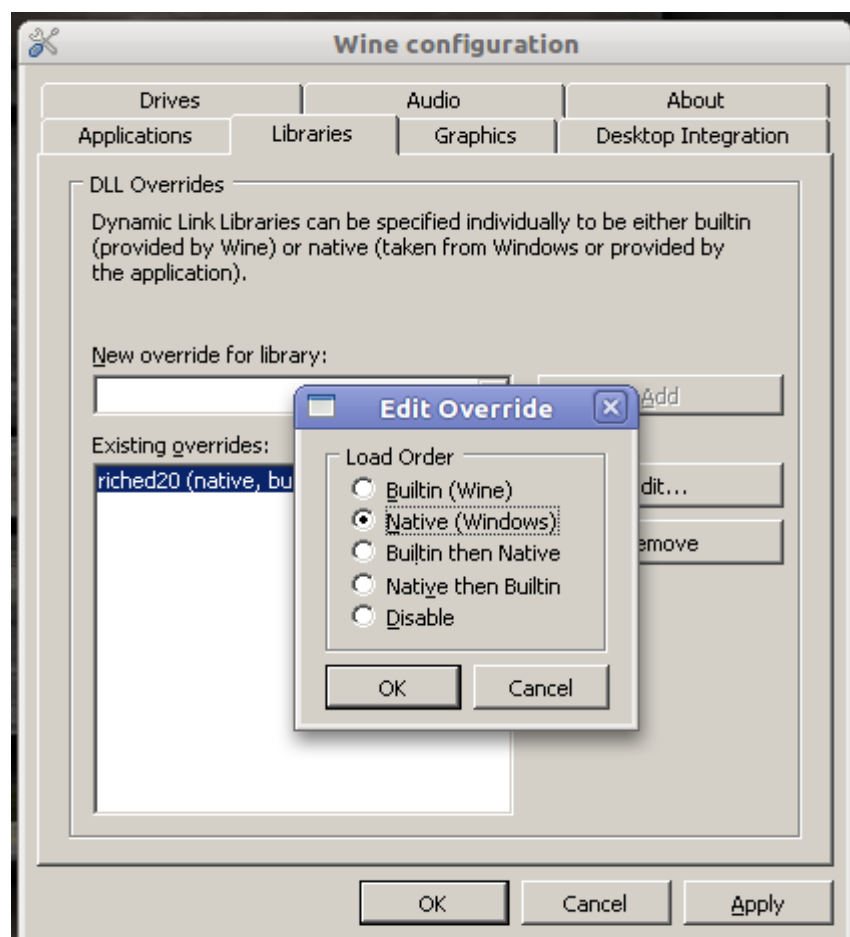

9-If you are using a newer version of wine than **3.14** or a development version you must in **winecfg** added **comsvcs.dll** and **mtxdm.dll**

If you are using never version of wine than **5.0** recommended added **msado15.dll** and marked as **native**

Otherwise Swisslog not starting with “OLE error 80004001“

And set as **Native**

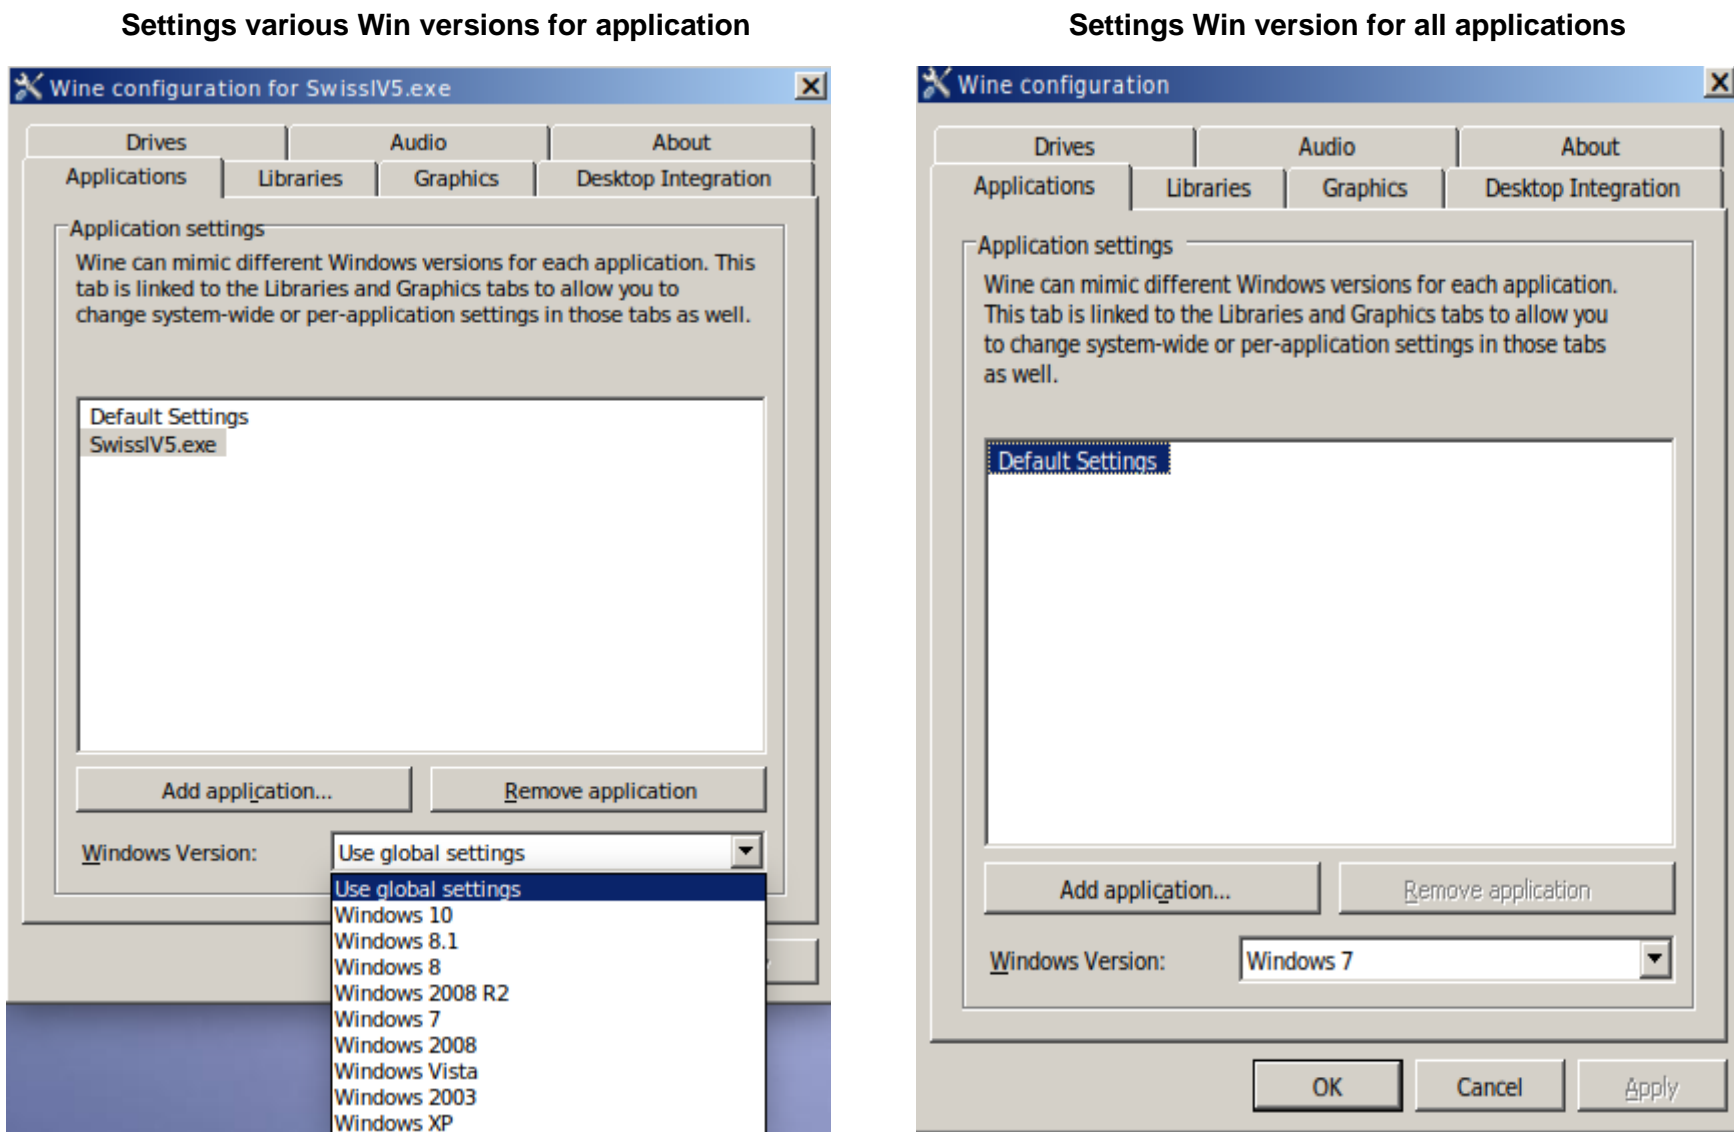

Add **msado15.dll**

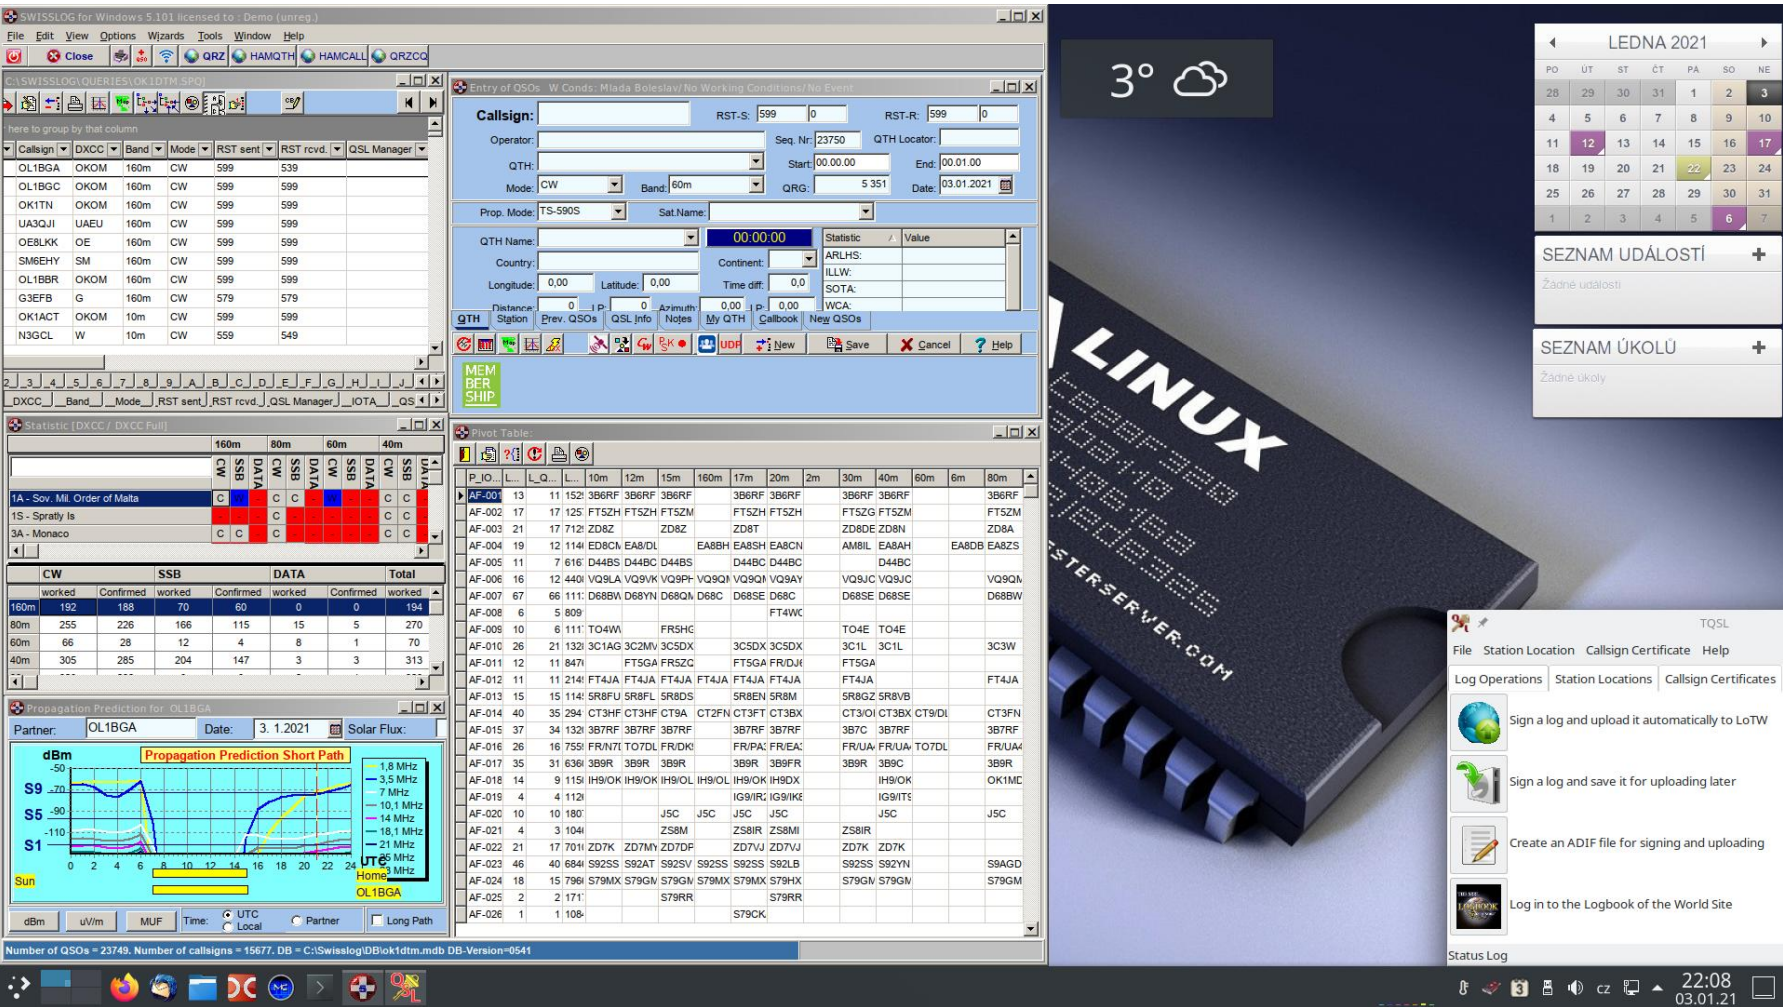

10-Setting Windows 7 due to TLS 1.2 / lotw in terminal

Terminal as user: **winecfg**

select Applications and set Windows 7 or later due to TLS 1.2 ver. (WinXP/Lotw no worked)

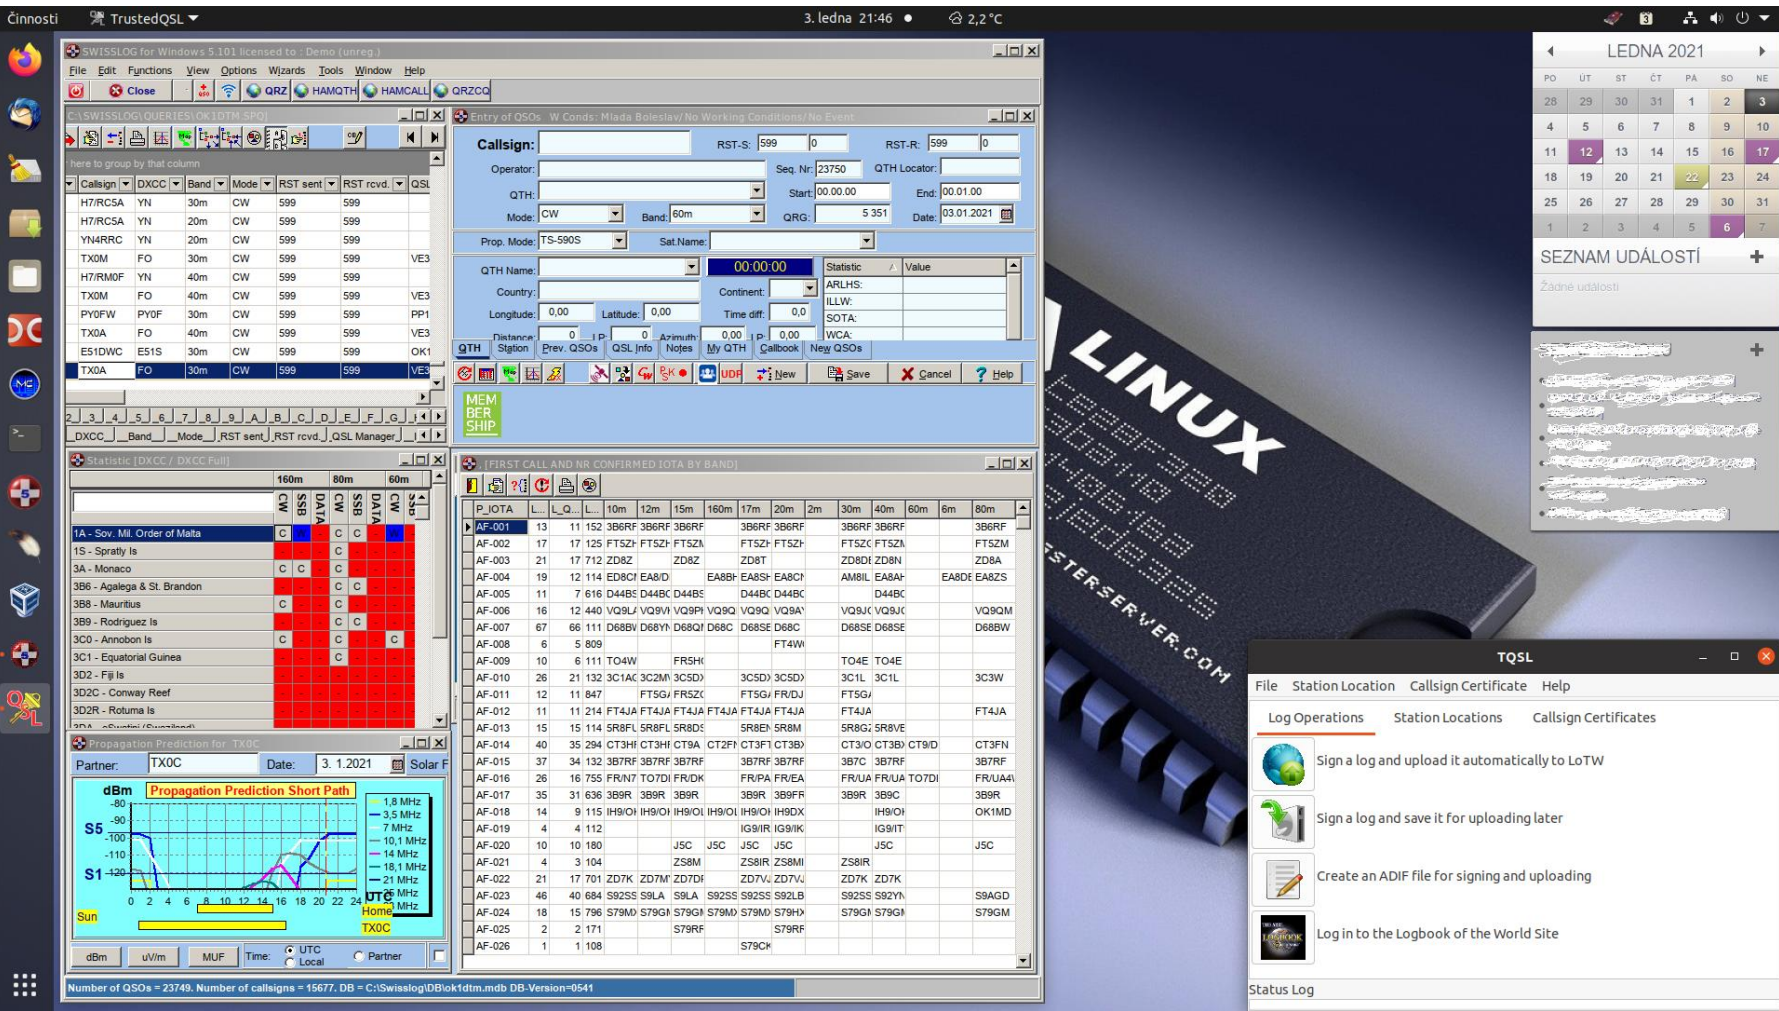

11- Swisslog and Kde neon

Swisslog installed in [KDE neon](#) based Ubuntu 20.04 Long Term Support

12- Swisslog and Ubuntu 20.04 LTS

Swisslog installed in Ubuntu 20.04 LTS
